Upcoming Events

1) Registration and Classes

Registration for the Spring 1983 semester will be held February 3 and February 4. Classes will begin the following Monday, February 7. See the Time Schedule for details.

2) Preliminary Exams

Alice Emerson is scheduled to take her written prelims February 10 and February 11, and her orals on February 25. Sarah Schlanger will take her written prelims on February 17 and February 18, and her orals on March 2.

Announcements

1) Job Listings

The Department of Anthropology at Western Washington University will have a position available for an assistant professor starting Fall Quarter, 1983. The position will be tenure track, depending on availability of funds. The position is in biological anthropology, with a specialty in human variation/medical anthropology desired. Applicants must have a Ph.D. in Anthropology, and send vita, three letters of reference, and a list of publications to Dr. Angelo Anastasio, WWU, Bellingham, WA, by March 15.

The Department of Anthropology at the University of Colorado, Boulder will have a tenure track position open in January 1984 or August 1984 for an archaeologist with interests and expertise in cultural anthropology. Ethnoarchaeologists and scholars interested in cultural evolution and early civilizations are encouraged to apply. The position will be at the assistant professor level. Applicants should send letter, vita, and names and addresses of three references to Chairman, Archaeology Recruitment Committee, Department of Anthropology, UC-Boulder, Campus Box 233, Boulder, CO 80309, by May 15.

The Winema National Forest will have four temporarily positions open for archaeologist technicians from May 29 to sometime between September 30 and December 30, 1983. Applicants must have three years of archaeological experience. Archaeological field schools and college or university study may be included in the three years. Applicants should fill out form SF-171 and send it to the Winema National Forest, P.O. Box 1390, Klamath Falls, OR 97601. For further information, contact Fran Philipek at (503) 882-7761 ext.441.

The Department of Sociology/Anthropology at North Dakota State University will have a non-tenure track position in Anthropology open for the 1983-1984 academic year. Rank will be from Instructor to Assistant Professor, depending
upon qualifications. Qualifications include broad-based training in anthropology. Ethnological grounding in Southeast Asia, the Middle East, or Africa is highly desirable. Applicants should be at least ABD, and send vita, transcript, and three letters of recommendation to Dr. Thomas D. McDonald, Department of Sociology/Anthropology, NDSU, Fargo, ND 58105, by April 15.

The Center for Archaeological Investigations at Southern Illinois University has positions open on the Black Mesa Archaeological Project for summer 1983. The project is open to graduate and undergraduate students. Approximately 75 staff members will be selected. Salaries range from $1700 to $3300 for the summer. Crew chiefs, assistant crew chiefs, lab assistants, and two research associates for ceramic and lithic analysis will be hired. Applicants should send cover letter and vita with names and addresses of references to Shirley Powell, Director, Black Mesa Archaeological Project, Center for Archaeological Investigations, Southern Illinois University, Carbondale, IL 62901, by April 1.

The Department of Archaeology at Boston University has two positions open for archaeologists, one for an experienced contract archaeologist to direct the Office of Public Archaeology, and one for an Assistant Professor of Archaeology with a specialty in Middle Eastern Archaeology. Applicants should send vita and cover letter to Professor James R. Wiseman, Department of Archaeology, 232 Bay State Road, Boston, MA 02215.

The Department of Anthropology at Oregon State University is establishing an applicant pool for teaching staff positions in anthropology. Applicants may hold the M.A. or Ph.D. degrees. Teaching experience is required. Applicants should send letter of interest, vita, and three references to Chair, Department of Anthropology, OSU, Corvallis, OR 97331.

The Department of Anthropology at Macalester College has a position open for an assistant professor in cultural anthropology. The appointment will be to fill a temporary term position, and will begin on September 1, 1983. Applicants should send resumes to David McCurdy, Department of Anthropology, Macalester College, St. Paul, MN 55105, by February 15.

2) Fellowships and Grants

The School of American Research, Santa Fe, NM, announces its Resident Scholar Fellowship Program. Funding is provided by the Weatherhead Foundation and NEH to Ph.D. candidates, postdoctoral scholars, and retired scholars. While the program stresses southwestern studies, scholars in other areas are encouraged to apply. Tenure will be from September 1, 1983 to August 1, 1984. For further information, contact the School of American Research, P.O. Box 2188, Santa Fe, NM 87501.

The American Anthropological Association announces Congressional Fellowships to allow Anthropological Fellows to work as full-time congressional aides or on the staff of a Congressional Committee for one year. Fellows will be in Washington, D.C. from early November to mid-August. Applicants must have a Ph.D. or be Fellows of the Association, and must send vita, names and addresses of three references, a 1500-2500 word paper that convincingly relates a research interest to a specific policy area, a 250-500 word summary meaningful to a non-anthropologist, and a 250-500 word statement describing future professional
goals and how these relate to the Fellowship. Applications should be sent to the Congressional Fellowship Program, American Anthropological Association, 1703 New Hampshire Avenue NW, Washington, DC 20009, by February 15.

3) Non-Taxable Income

A reminder to all teaching and research assistants: forms for declaring TA and RA income non-taxable are available from the receptionist at the Controller's Office at French Ad. Forms should be completed and returned to the receptionist.

4) Computer Consultants

Steve Samuels and Don Howes are available to faculty and students for computer consulting each weekday morning in their offices at the Anthropology Lab. Tentative office hours for Spring semester are, Howes from 9-11 AM and Samuels from 11 AM to 12 noon.

5) Spring Semester Course Changes

Several course changes have occurred since the Time Schedule was printed:

- Anth 422/522 NAT PEOP NW will be taught by Dr. Daugherty T,Th 2:00 P.M.
- Anth 538.1 has been cancelled.
- Anth 538.2 has been cancelled.
- Anth 543 PLATEAU PREHIST will be taught by Dr. Gustafson at a time to be announced.

- Anth 557 LANG STRUCT will be taught by Dr. Gordon.
- Anth 577 QUAT VEG CLM has been cancelled.
- Anth 569 SEMINAR IN PHYSICAL ANTHROPOLOGY will be taught by Dr. Krantz W 7:00-10:00 P.M. This seminar will involve an investigation of the sasquatch phenomenon, and how it relates to anthropology in particular and to science in general.

6) New Enrollment Procedures For People Taking Exams

New procedures for people taking exams have been implemented for Spring 1983.

A. Students not on appointment as teaching, research, or staff assistants or associates, and enrolling solely for the purpose of completing theses or dissertations (700 or 800) or special problems (702) and taking final examinations must register for a minimum of three semester credit hours at WSU during that semester or summer session.

B. Students not on appointment as teaching, research, or staff assistants or associates, and enrolling solely for the purpose of taking master's or doctoral final examinations must register for a minimum of two semester hours of 700, 702, or 800 credit at WSU during that semester or summer session. The students' theses, dissertations, or special problems must have been completed during the prior semester to be eligible for the two-credit enrollment.

C. Students not on appointment as teaching, research, or staff assistants
or associates, and enrolling solely for the purpose of taking the preliminary examinations must register for a minimum of two semester hours of 800 credit at WSU during that semester.

D. Students in any of the above categories who complete the enrollment after the tenth day of classes must register for a minimum of four semester hours of 700, 702, or 800 credit.

In other words, students must now register for 700 or 800 hours; not just 3 hours of P.E. The departmental policy on enrolling for two hours to take final examinations is that the scheduling form giving full and final approval of the thesis or dissertation must be signed by the committee before the new semester starts. Letters from the chairman are no longer required.

7) HRAF data base on SAS

The HRAF data base acquired from Central Washington University by WARC last fall has been re-organized into a format readable by the Statistical Analysis System (SAS) by Dr. Kohler. This file is available to anyone in the department. The data resides in $AINDX.Y6896.HRAF on USER01, a public access disc at WSUCSC. It is approximately 2336 lines long, containing 1169 separate entries with two card images per entry.

A SAS job containing the proper data step and labels to run the file is contained in $AINDX.Y6896.HRAFDRIV on USER01. For further information contact Dr. Kohler or Dr. Lillian Ackerman.

8) Anthropology Department Logo Contest

The department is offering a $50.00 scholarship for the creation of a new logo for the department stationery. The contest is open to graduate and undergraduate majors. Deadline for application is March 31. Applications and additional information are available at the main office in Avery.

News

1) Examinations and Defenses

Three students have successfully defended their theses and dissertations recently. James Gallison's thesis is entitled "Archeological Investigation and Technological Analysis of an early to mid Holocene core and blade assemblage (GDN 093) Kagati Lake, Southwest Alaska." Betsy Tipps' thesis is called "The Captains Alcove: test excavations in Glen Canyon National Recreation Area, Cane County, Utah." Phillip Shelley's dissertation is entitled "Lithic specialization at Salmon Ruin, San Juan, County, New Mexico."

2) Faculty Appointments

Dr. Fekri A. Hassan has recently become Contributing Editor to Quarterly Reviews of Archaeology. He is responsible for reviewing books and articles on geoarchaeology and North Africa. Dr. Hassan's first review was on The Geologic History of the River Nile by Rushdi Said, and appeared in the December issue.
Dr. William D. Lipe has recently been named Director of the Center for Northwest Anthropology, formerly the Laboratory of Archaeology and History. The Center is designed to maintain a strong Northwest research program while keeping ties with the academic department. Dr. Lipe's appointment is for one year.

3) Student Awards

Two doctoral students have recently received awards which will facilitate their dissertation work. David Huelsbeck was awarded a $500.00 WSU Foundation Fellowship for Spring semester 1983. These fellowships were awarded to 14 students who have shown high academic achievement, and who are actively engaged in dissertation research and/or writing. Christopher Brown received a grant from Sigma Xi to pay for computer time to work with satellite data for southwest Washington for his dissertation.

4) Donation Received

Dr. and Mrs. Richard D. Daugherty have recently donated $1000.00 toward the purchase of a word processor for the Anthropology Department. The department presently has to share time on the IBM Displaywriter at Kimbrough Hall.

5) Hoko Symposium at SAA Meetings

The Hoko River Archaeological Project has been accepted for a symposium on the rockshelter at the meetings of the Society for American Archaeology in April. The symposium will be held the morning of April 30.

6) Smithsonian Regional Events at WSU

The Smithsonian Regional Events Program will come to WSU in May of 1984 to coincide with the opening of the Anthropology Museum at its new College Hall location. The program offers a series of speakers and displays highlighting current Smithsonian research and complementing local museum interests. To date the program has visited 55 cities, and has been quite well received.

7) Cultural Extravaganza

The first annual Cultural Extravaganza and Reception was held in the Anthropology Lab lounge January 13 from 8:00 P.M. to 10:00 P.M. Student and faculty artwork on exhibit included photography, woodcarving, paintings and drawings, 17th and 18th century clothing, jewelry, needlepoint, and much else. Participation by students and faculty was enthusiastic, making for an enjoyable and successful event.

8) Colloquia

Dr. Fekri Hassan and Dr. Robert Ackerman recently gave presentations as part of the Anthropology Department's continuing series of colloquia.

Dr. Hassan spoke on "Pharaohs and Farmers," focusing on cognitive aspects of the rise of Egyptian civilization. Through an examination of their myth and symbolism, Dr. Hassan characterized the ancient Egyptian people's world view as one in which harmony and interrelationships between the cosmos and the mundane served to legitimize the pharaoh's divine rule, and to instill faith in the Nile-based agricultural system. The result was a well-ordered and
stable society which facilitated the development of cultural complexity.

Dr. Ackerman's topic was "Education and Life in the Soviet Union." He discussed the degree to which the Communist Party pervades all levels of Soviet academic life. To be successful, university professors must not only teach and conduct research, they must be active Party members; devoting considerable time and energy to political activities. In return for their Party allegiance, they and their families are accorded certain privileges that other Soviet citizens, even doctors and lawyers, do not enjoy.

9) Faculty/Student Profile

Our third profile is on Dr. Richard D. Daugherty, a man whose career has spanned much of the development period of scientific archaeology in the northwest, who has long been an influential figure in archaeology-related legislation, and who is largely responsible for the character and reputation of the archaeology program here at WSU. Since it would be impossible to enumerate all of Dr. Daugherty's many accomplishments in the short space available, this profile will be a selective but hopefully representative view of his career.

A lifelong Washington resident, Dr. Daugherty graduated from Weatherwax High School in Aberdeen in 1940. He entered Central Washington State College in Ellensburg later that year, just prior to the outbreak of WWII. During the war, he served as a blimp pilot for the U.S. Naval Air Corps. He was married in 1944, and upon his return to civilian life in 1946 he completed the requirements for his B.A. degree at the University of Washington in Seattle.

One of his first jobs as an archaeologist was with the Smithsonian Institution's River Basin Surveys in 1947 and 1948. During these summers, Dr. Daugherty helped survey 14 reservoirs in Washington, Idaho, and Montana. He also helped excavate the Indian Village site near Moses Lake. In 1950 he came to WSU and with Dr. Allan Smith began the Anthropology program. Dr. Daugherty became Assistant Professor in 1954 (the year he was awarded the Ph.D. from the University of Washington), Associate Professor in 1959, and Professor in 1963.

Dr. Daugherty's activities have been many and varied over the years. During the 1950's and 1960's he directed or administered archaeological surveys and excavations throughout Washington, including work at the Lind Coulee site (on which he based his dissertation), McGregor and Porcupine Caves, Wells Reservoir, Ice Harbor Reservoir, Windust Cave, White Rock Village, Fort Spokane, Marmes Rockshelter, Ozette Village, and many others. He published articles and read papers at professional meetings yearly. He served as chairman of the Northwest Anthropological Conference in 1952, and the Great Basin Archaeological Conference in 1958. He participated in the International Symposium on Archaeology in Austria in 1962, and in that same year he went to Egypt to work on the Aswan Dam Project. He was for several years assistant editor of American Antiquity. He also became involved in the political side of archaeology, sitting on regional and national committees including the Committee for the Recovery of Archaeological Remains. In 1967, President Johnson appointed him to the National Advisory Council on Historic Preservation. He remains the only archaeologist to ever hold that post. From 1968 to 1971 Dr. Daugherty was on the Advisory Board, National Trust for Historic Preservation.
During the 1970's and 1980's Dr. Daugherty has continued his active involvement in all aspects of archaeology. He was chairman of the WSU Anthropology Department from 1970 to 1971, Director of the Washington Archaeological Research Center from 1972 to 1979, and Director of the Laboratory of Archaeology and History from 1980 until his retirement in December of 1982. He continued to administer archaeological research programs which provided support for and training of students.

Dr. Daugherty has received numerous awards and honors during his career. In 1969 he was named "Distinguished Citizen of the State of Washington" in special resolution by the Washington State Senate. In that same year he received special commendation for research efforts at Marmes Rockshelter by the Senate. As part of this honor he was given a silver trowel. In 1971 he received "The Governor's 1971 Arts Award" from the Washington State Arts Commission and the Makah Nation. In 1974 he and Ruth Kirk received two awards for their book, *Hunters of the Whale*; the "Outstanding Science Book for Children Award" by the National Science Teachers Association and the Children's Book Council, and the "Fourth Annual Children's Science Book Award" by the New York Academy of Science. In 1977, Dr. Daugherty received the "Outstanding Scientist Award" from the Northwest Scientific Association. In 1979 he and Ruth Kirk received the "Governor's Writers Day Award" for their book, *Exploring Washington Archaeology*.

Dr. Daugherty retired December 31, but returned to 40% active this semester for two years to assist his graduate students in completing their degrees, and to do some teaching. He is still involved in research efforts, such as the Ozette project, and he recently visited Dr. Barbara Purdy in Florida to consult with her on excavations there.

In talking with Dr. Daugherty about his career, he seems most proud of two things: developing the multi-disciplinary archaeology program at WSU, and providing funding and training for graduate and undergraduate students through research projects. Dr. Daugherty recognized the need for a multi-disciplinary focus while working on the Lind Coulee site, where he realized that much of the literature on paleoenvironmental reconstruction was not applied to archaeology, and that courses on the subject were often not very worthwhile to archaeologists. He began to assemble people from different disciplines who were interested in archaeology to work on sites and teach courses to archaeologists. Roald Fryxell and Carl Gustafson came to archaeology from geology and zoology, respectively, as part of this program. As far as funding and research opportunities are concerned, Dr. Daugherty has raised and administered close to $10 million in research projects over the years, providing many students with materials for theses and dissertations.

Dr. Daugherty is also proud of his family. His wife, Phyllis, has been supportive throughout his career. She often worked in the field in various capacities, being particularly indispensable with organization and public liaison. She recently retired from WSU after 20 years of service. The Daugherty's have three children who still live not too far away, and four grandchildren.
